THE GLOBAL WOMEN'S NETWORK FOR THE ENERGY TRANSITION PRESENTS

Energy Transition Role Models

Inspiring the Next Generation of Women Entrepreneurs
# Table of Contents

1) **Sustainable Energy Entrepreneurship and the Role of Women**

2) **Energy Transition Role Models: Inspiring the Next Generation of Women Entrepreneurs**

- Catherine Adelmann – Fosera, Germany | Offgrid Solar, Manufacturing
- Maysoon Al-Khuraissat – adaa Sustainable Development Consultants, Jordan | Energy Efficiency in Buildings
- Damilola Asaley – Ashdam Solar Ltd, Nigeria | Offgrid Solar
- Dr Linda Davis – Giraffe Bioenergy, Kenya | Bioenergy, Ethanol
- Audrey Desiderato – SunFunder, Kenya | Debt-financing, Solar
- Dr Jemma Green – Power Ledger, Australia | Blockchain, Energy Trading
- Margaret M. Groff – formerly Itaipu Binacional, Brazil | Hydropower
- Tania Laden – LivelyHoods, Kenya | Social Enterprise, Offgrid Solar and Clean Cooking
- Katherine Lucey – Solar Sister, Kenya | Social Enterprise, Offgrid Solar
- Majd Mashharawi – SunBox, Gaza/Palestine | Social Enterprise, Offgrid Solar
- Dr Margarete von Oppen, ASD Law Firm, Germany | Renewable Energy Law
- Amira Rachid, AR Solaire Ingénierie, Tunisia | Solar
- Morwesi Ramonyai, Borena Energy, South Africa | Solar PV Project Developer
- Dr Ana Trbovich, Grid Singularity, Germany | Blockchain, Energy Trading
- Katarina Uherova Hasbani, Enrupt, Singapore/United Arab Emirates | Network for Energy Start-up Innovation
- Itzel Velasco, Energetec, Mexico | Offgrid Solar
- Laurie Wiegand-Jackson, UtilityAdvantage, United States | Energy Services Consulting
- KaiKai Yang, Dipole, China | Blockchain, Energy Trading
Our interviewers
• Alejandra Campos, Coordinator – International Relations, REDMEREEE, Mexico
• Bruna Ventura Hoffmann, Researcher, Lactec, Brazil
• Emily Marsay, PhD student, University of Exeter, UK
• Mirana Njakatiana Andriarisoa, Energy Policy Student, Pan African University for Water and Energy Sciences, Algeria
• Davina Ngei, GWNET Communications Manager
• Irina Gaubinger, GWNET Project Manager

3) Resources
• Worldwide initiatives, contact points and information
• Regional initiatives, contact points and information
• Country initiatives, contact points and information

4) About GWNET
GWNET would like to especially thank all interviewees for sharing their experiences and insights for the purpose of providing young women with an encompassing perspective of what it is like to be a women entrepreneur in sustainable energy. GWNET would also like to thank the German Federal Ministry for Economic Affairs and Energy (BMWi) for supporting this initiative.

Supported by:

Federal Ministry for Economic Affairs and Energy

on the basis of a decision by the German Bundestag

GWNET, 2019.
Energy Transition Role Models: Inspiring the Next Generation of Women Entrepreneurs.

This initiative was led by Irina Gaubinger, GWNET Project Manager with inputs from GWNET Executive Director Christine Lins, GWNET Communications Manager Davina Ngei and GWNET Project Assistant Eva Hauser. GWNET would like to specially thank all interviewees and interviewers for their contribution to this initiative.

This brochure is ‘work in progress’ and will be continuously updated. Should you be aware of any additional information for our resources section, please get in touch at info@globalwomennet.org.

DISCLAIMER:
Although the information given in this brochure is the best available to the authors at the time, GWNET cannot be held liable for its accuracy and correctness, neither for any external content this brochure links to.
1. Sustainable Energy Entrepreneurship and the Role of Women

The energy transition and the favourable outlook of the renewable energy sector offer plenty of opportunities in a broad variety of professional occupations in general and, more specifically, for a more balanced representation of women and men. However, women’s increased participation in sustainable energy has not yet become a reality. Despite an increased presence of women in the energy sector in the past years - especially in the energy access context [1] - and female founders on the rise, the percentage of women-led enterprises in off- and on-grid sustainable energy solutions that go beyond basic energy access is still lacking behind. This is unsurprising when looking at the percentage of women in STEM studies (35% globally [2]) and the ratio of female-led companies (20% of companies globally [3]).

There are a number of initiatives that try to overcome the underrepresentation of women in STEM studies from teenage age onwards. But then still very few female students and graduates find their way into the sustainable energy field.

The lack of female role models together with unconscious bias about the image of what leadership looks like have been cited as some of the main hindrances to women’s engagement in general; and they are especially relevant for male-dominated industries such as energy. [4]
GWNET in cooperation with the German Federal Ministry for the Economic Affairs and Energy (BMWi) works towards changing this picture and aims to inspire girls and women around the world to overcome these hurdles, to confront the challenges women encounter when setting up or managing a venture in the sustainable energy sphere and to put their business ideas into practice. With women entrepreneurs allegedly being 5% more likely than men to come up with innovation, the energy transition can only benefit from an increasingly equal engagement of women. [1]

With this in mind we are showcasing portraits of remarkable women entrepreneurs in sustainable energy. To balance the picture of the still predominant image of male leadership – and also male entrepreneurship, our portraits show a wide array of what is possible for female entrepreneurs in the sphere of sustainable energy, including – but not limited to – innovative blockchain based solutions, financing and legal services.

The Energy Transition Role Models have lent their stories, image and words for all interested women to move from “You can’t be what you can’t see” [2] to the exact opposite: giving female leadership visibility and thereby inspiring and encouraging others – especially young female students and graduates – to follow suit.

Apart from sharing individual personal experiences and insights into their entrepreneurial journeys, we identified quite a few commonalities among our interviewees, such as

- the desire to have an impact as a driver for founding one’s own business;
- the desire for factual and intellectual independence;
- the ability to flexibly manage one’s time and to use time efficiently;
- the need for a good business partner;
- the eagerness to learn as a prerequisite to continued success;
- the acceptance of mistakes and/or failures and to incorporate the lessons learned; or
- the importance of equitable parental leave, appropriate childcare, and having suitable support systems in place for families.

Throughout the conversations we also observed a high level of awareness of the interviewees about the status of women in the sector and in leadership positions and that many of the Energy Transition Role Models are already actively engaged in supporting women in their field.
This brochure is intended to provide snapshots about the Energy Transition Role models career pathways, the main characteristic of their ventures, the most memorable quotes from the interviews and a few personal recommendations. We hope that the viewers and readers of the portraits and this brochure will experience the same as we did when creating them: a strong sense of encouragement and inspiration and a feeling of pride on behalf of the women featured by GWNET as Energy Transition Role Models.

2. Energy Transition Role Models: Inspiring the Next Generation of Women Entrepreneurs
Catherine Adelmann
CEO AND FOUNDER
FOSERA
GERMANY

Offgrid Solar | Manufacturing

Bio
Catherine founded Fosera in 2011. The company manufactures solar home systems for off-grid electrification. Catherine set the course for her career as an entrepreneur already during her time as a student - without being aware of it. She developed a solar island system and a business plan for a university project and her professor encouraged her to turn it into a business model. Since then the product range of Fosera has expanded quickly following a "modular system design" that allows a tailored approach depending on the energy needs and purchasing power of the customer. Catherine works passionately to pursue her long-term goal: providing solar energy to developing countries to a level that is similar to the one in Germany.

Education
- Master’s degree (MSc) in Advanced Management, Neu-Ulm University of Applied Sciences, Germany
- Bachelor’s degree (BEng) in Industrial Engineering, Ulm University of Applied Sciences / Neu-Ulm University of Applied Sciences, Germany

Company Profile
Fosera is a manufacturer of high-quality Solar-Home-Systems for Off-Grid Electrification, founded in 2011 in Ulm, Germany. To date, Fosera has sold about 300,000 solar systems. The product offering systems starts from entry level lighting systems to larger solar systems for TV or cooling.

Fosera has its factory based in Pathumthani, Bangkok, which is also certified to ISO9001, quality, ISO:14001 (environment) and ISO:45001 (health and safety). Fosera has positioned itself as a pure system manufacturer and works with distribution partners in Africa, Asia and Latin-America.

More information is available at: http://fosera.com/
Selected Interview Quotes

About career pathways
“Don’t be afraid that you don’t have the proper education. Anyway, no university will be able to teach you everything. So just do it…try it out!”

Message
“If you have considered becoming an entrepreneur, do it! Don’t be afraid of failing. It will be intense, it will be sometimes very difficult, but it will be also extremely rewarding.”

Catherine's personal recommendations

Entrepreneurship support in Germany

- Funding support in the Baden Wuerttemberg region
  https://www.startupbw.de/finanzierung-foerderung/finance/pre-seed/

- Funding support for students: https://www.exist.de/DE/Programm/Exist-Gruenderstipendium/inhalt.html
Maysoon Al-Khuraissat

GENERAL MANAGER AND FOUNDER
ADAA SUSTAINABLE DEVELOPMENT CONSULTING
JORDAN

Energy Efficiency in Buildings

Bio
Maysoon is the founder of ‘adaa Sustainable Development Consultants’. She is an Accredited Professional Architect with a specialty in Sustainability and Green Building Design. She has over 18 years of international experience in sustainability, Green Building, and Architecture. Her work focuses on providing Green Designs and assessments for buildings in the Energy Efficiency, Performance Optimization, and Sustainability areas.

Maysoon is a leader in the Green movement in Jordan and part of a group working hard to create a more sustainable and energy-independent Jordan. She was involved in many international design projects in the US and the Middle East with a focus on energy efficient buildings, environmental design, and construction technology and community advocacy in sustainability issues. As a trained instructor she conducted many Green Building workshops and developed sustainability courses and research in the subject area.

Maysoon is a LEED Professional, USGBC Faculty, EDGE Expert and EDGE Auditor and EDGE Regional Trainer with GBCI. She is also the winner of the “Women Innovators in Charge” Award 2016.

Education
• Bachelor’s degree in Architecture, Engineering and Technology, University of Jordan, Jordan
• Master’s degree in Architecture, University of Illinois at Chicago, United States

Company Profile
adaa is an independent innovative consultancy that works with architects in Jordan in the area of optimising building design performance. adaa facilitates the sustainable development of buildings across the MENA region, helping architects to design more efficient buildings that use less energy, water, and resources while being comfortable for occupants.
SBY applying top of the art simulations throughout the design process, and best practice approaches in evaluating the potential performance of the design, adaa guides designers on selecting the best form, layout, massing, material, system and overall best performing building and design.

adaa focuses on Sustainable Environmental Design, linking architectural relations to environmental sciences, building physics and performance simulation. adaa was established in 2017 with a great passion for making sustainable change in the local and the regional built environment.

More information is available at: [www.adaaconsultants.com](http://www.adaaconsultants.com)

**Selected Interview Quotes**

**Messages**

“Build experience first, don’t rush... but during that start planning for your own (ad)venture.”

“Don’t be afraid to express your ideas, but make sure that your idea is mature.”

“If you are spreading knowledge you are building demand for what you are doing.”

“Keep learning, don’t waste your time, dream big and work hard for it.”

**Maysoon’s personal recommendations**

- The Islamic Development Bank, for example, supports female empowerment in many aspects, they provide funding, prizes and even partnerships for innovative projects and ideas (not only limited to Energy but to the SDGs). More information is available at: [www.isdb.org/get-involved/female-empowerment](http://www.isdb.org/get-involved/female-empowerment)
Bio
Damilola is the Chief Operating Officer and Co-Founder of Ashdam Solar Company Limited. As a young girl, having experienced the loss of a family member due to petrol explosion, Damilola dreamt of eradicating the dependence of Nigeria on fossil fuel and became passionate about alternative energy. Today, Damilola is also the lead instructor of the Ashdam Solar Academy, which to date trained more than 500 practitioners.

She founded the Ashdam Solar Initiative, convays the Green Tech Girls summer bootcamp and initiated the Solar Queen Technical Scholarship program. Through her initiatives, she has empowered more than 1,500 girls and women in the area of green technologies. Damilola is currently concluding her doctoral research in Energy Engineering with specialty in renewable energy microgrids and demand side management. She is a Robert Bosch Alumni, an Ashoka Change Maker Xchange fellow, and was recognized as one of the foremost women in Renewable Energy Nigeria by the Environment Magazine in the year 2017. She was awarded the Energy Professional of the year 2018 by the Nigeria Energy Awards.

Education
- BSc in Physics and Solar Energy, Bowen University Iwo, Nigeria
- MSc in Physics, Atmospheric Physics and Meteorology, University of Ibadan, Nigeria

Company Profile
Ashdam Solar Co. Ltd is a renewable energy company in Nigeria, providing clean, affordable and uninterrupted smart energy solutions. Ashdam Solar got incorporated in 2007 and over the years, has built its reputation by providing quality alternative energy solutions to the Nigerian community. Ashdam Solar is dedicated to analysing clients’ energy requirements and coming up with appropriate customized energy solutions.
Ashdam Solar’s training arm, the Ashdam Solar Academy is raising an army of skilled entrepreneurs that will expand the market for solar energy and make uninterrupted power possible across Africa and beyond with an element of gender inclusion in the renewable energy industry.

Messages
“When you start (an enterprise) you cannot have all the skills at once... build your capacity... you have to continue learning.”

“Don’t start a day without a good plan.”

“Don’t limit yourself! Don’t let the society determine what you want to be. You can be whatever you want to be!”

Damilola’s personal recommendations
Programmes and opportunities

- ChangemakerXchange platform by Ashoka and the Robert Bosch Stiftung: https://changemakerxchange.com/

Books

- “Becoming” by Michelle Obama
- “The 7 Habits of Highly Effective People” by Stephen R. Covey
Bio
Dr Linda Davis is Founder and CEO of Giraffe Bioenergy, a developer of large-scale cassava bioeconomies in Kenya producing both food and fuel to secure livelihoods. Linda has over 15 years’ experience in senior-level positions within the renewable energy sector, including conventional and cellulosic ethanol technologies and algae-based biofuels.

Education
- BSc in Food Science and Technology, Jomo Kenyatta University of Agriculture and Technology, Kenya
- MSc and PhD in Microbiology and Biotechnology, University of Western Sydney, Australia
- Certificates in Petroleum Refining, Project Management, Finance and Accounting, Stanford University, United States

Company Profile
Giraffe Bioenergy is a developer of large-scale fuel ethanol biorefineries in Kenya. Its cassava-to-fuel ethanol systems reduce the reliance on charcoal and firewood for cooking while improving health, reducing deforestation, improving livelihoods and addressing climate change. Giraffe Bioenergy’s aim is to establish local production of ethanol to foster rural development, economic opportunities for small-scale farmers and create a steady market for their crops; specifically the cassava plant.

More information is available at: https://giraffebioenergy.com/

Selected Interview Quotes
Message
“Start where you are. If you have got a passion there is a problem that you want to solve, just start. Take it one day at a time, on step at a time. Just definitely start. We need a lot more entrepreneurs in this area. Let more women look at this as a career that they can pursue and let us create a critical mass.”
Audrey Desiderato

CCO AND CO-FOUNDER
SUNFUNDER
KENYA

Debt-financing | Solar

Bio
Audrey is Co-Founder and Chief Commercial Officer for SunFunder. She has been working in East Africa since launching the company in 2013 and is currently based in Nairobi, where she is responsible for the company’s commercial strategy and team growth. Today, SunFunder has unlocked $135 million in debt financing for solar in emerging markets, financed 46 solar companies and impacted more than 7 million people with improved access to clean energy. Prior to SunFunder, Audrey worked in the U.S. energy efficiency space and for energy access impact investor E+Co. She was also a founding member of GOOD magazine.

Education
• Bachelor’s degrees in Economics and Political Sciences, UCLA
• Master’s degree in International Energy Management & Policy, Columbia University’s School of International Affairs
• Master’s degree in Environment and Sustainable Development, Sciences Po Paris

Company Profile
SunFunder provides innovative debt financing for solar enterprises working in emerging and frontier markets. SunFunder collaborates with major debt fund investors around the world to unlock capital for solar energy projects. Scaling up solar in the places that need it the most requires debt financing led by a deep understanding of the market. SunFunder provides that capital and expertise, acting as a financing bridge between those who want to invest in this rapidly emerging sector, and those who need funding to scale solar and storage solutions.

In a sector that still faces a lack of commercially-oriented financing, SunFunder has developed a successful model for unlocking investor capital and providing the financing required to power lasting change.

Selected Interview Quotes

**Do’s and Don’ts**

“Do find the right partner, build the right team. Set the right goals, track them and constantly learn from them. Do take care of yourself. Do learn by doing...small mistakes are important.”

“Don’t work with ass*****. Don’t ignore your intuition when making decisions.”

**Message**

“Do not be afraid to fail. Failures are an inevitable part of success. We should not let failures affect our confidence. They are necessary risks in our learning journey and they will make us better for next time.”

**Audrey’s personal recommendations**

**Books**

- “Good to Great: Why Some Companies Make the Leap...and Others Don’t” by Jim Collins
- “Measure What Matters: OKRs: The Simple Idea that Drives 10x Growth” by John Doerr
Dr Jemma Green
EXECUTIVE CHAIRWOMAN AND CO-FOUNDER
POWER LEDGER AUSTRALIA

Blockchain | Energy Trading

Bio
Dr Jemma Green is Co-Founder and Executive Chairman of Power Ledger, a technology company that uses the blockchain to facilitate energy trading, energy asset financing and carbon markets. Setting her career trajectory early on, Dr Green became the voice of sustainability and corporate social responsibility in the business of big money lending while at J.P. Morgan in London.

She then went on to become a research fellow at Curtin University, was Deputy Lord Mayor of Perth, set up the first fossil fuel free pension fund and has sat on numerous boards championing sustainable business such as Carbon Tracker and Climate-KIC Australia. In 2016 Jemma cofounded Power Ledger and in 2018 Jemma was named EY Australian Fintech Entrepreneur of the Year.

Education
- Bachelor of Commerce, Murdoch University, Australia
- MSt in Sustainability Leadership, University of Cambridge, UK
- PhD, Sustainability Policy Institute, Curtin University, Australia

Company Profile
Power Ledger is an Australian technology company that has developed a blockchain-enabled renewable energy trading platform. In 2018, Power Ledger’s technology won Sir Richard Branson’s global Extreme Tech Challenge award. The company has built a series of products to enable energy trading, renewable asset financing and renewable energy credit markets. Power Ledger has active projects across Australia, Asia, Europe and the United States.

Selected Interview Quotes

Do’s and Don’ts

“Do carve out a little bit of space for yourself to do some things that are not work related that are important to you. You want to keep touch with the other aspects of yourself.”

“So acknowledge the progress you’ve made along the way, as a way of encouraging yourself and those around you.”

“Don’t neglect your health and well-being - it’s a marathon not a sprint, and if you don’t take care of those things you won’t accomplish the bigger goal.”

“Don’t take yourself too seriously.”

Message

“If you are not making any mistakes, the game you are playing is too small.”

“Your playing small does not serve anyone. You are powerful beyond measure, you just need to give it a go and find a thing that really aligns with what you want to do. Invest the time to develop mastery around it.”

Margaret M. Groff

FORMER CFO
ITAIPU BINACIONAL
BRAZIL

Hydropower

Bio
Since 1987, Margaret has been a Senior Executive of Itaipu Binacional; she retired in 2017. Margaret has held various management positions in the company. She was the first employee to obtain a position in the executive board of the entity. As CFO, Margaret was responsible for the management of finance, procurement, logistics, budgeting and accounting. She coordinated the Itaipu / Border Health Group, which seeks to align public health policies in the tri-border area (Brazil, Paraguay and Argentina), the Electric Vehicle Program and other Itaipu social projects.

Margaret is on the Boards of Directors of several businesses and social entities in Brazil. She is Founder and Advisor of the “Espaço das Mulheres Executivas do Paraná” and leader of the Women of Brazil Group, in Parana. Since 2011 Margaret has participated in the Women’s Empowerment Principles Leadership Group (WEPs LG) of UN Women and the UN Global Compact. She has lectured at national and international conferences on energy, finance, sustainability and gender equity and contributed her experience in editing the book “Women, They Do History” published in March 2012, which reflects on women’s leadership in the corporate world.

Margaret gained recognition as one of Brazil’s most influential women in the category of ‘Economy and Finance’, receive the award of the newspaper Gazeta Mercantil in 2007, and was awarded the Oslo Business for Peace Award in 2013. Margaret implements and coordinates the WEP Brazil - Empowering Women Award, with the aim of disseminating the culture of gender equity in Brazilian companies.

Education
- Bachelor’s degree in Civil Engineering, Universidade Federal do Paraná, Brazil
- Graduate and MBA in Finance from UNIFAE, IBMEC Brasil and ESADE Barcelona
Company Profile
Located at the border between Brazil and Paraguay, Itaipu is the world’s largest plant in power generation, with more than 2.6 billion MWh produced since 1984. With 14,000 megawatts of installed capacity, the plant holds the world record of annual energy production: 103.1 million MWh in 2016. It is responsible for 15% of the Brazilian market and 90% of the Paraguayan. In both countries, Itaipu acts on several initiatives on environmental conservation and sustainable development.

Bio
Yisha He currently serves as Chairwoman of the Board of Unisun Energy Group (UNISUN), Uper Energy (UPER), as well as Optim Energy (OPTIM). UNISUN is one of China’s largest investors in distributed solar PV projects; UPER is a renewable asset management leader in China, while OPTIM is a global provider of energy storage products and solutions.

In 2018, Ms. He co-founded Women in Renewables Asia (WiRA, https://www.womeninrenewables.org/), the first NGO empowering women in the renewable energy sector in Asia, and was elected as Chairwoman of the Board. Ms. He has participated in many corporate social responsibility events to encourage more women to enter the sector and raise public awareness of the importance of clean energy.

In recognition of her contributions to the development of renewable energy and her charity work, Ms. He received the Social Eco Game Changer Award at the Global Green Economic Forum, the Women in Renewables of the Year Award at the Global Solar + Energy Storage Congress & Expo 2018, the Woman of the Year Award at the Clean Energy Expo China 2019, and the Woman of the Year Award at China Charity Festival 2019.

Education
- BSc in Mathematics, University of Oxford, UK
- Master’s degree in Finance, Cass Business School, UK

Company Profile
About Unisun Energy Group
Unisun Energy Group (UNISUN) is a global clean energy solutions provider offering solutions and investment for solar and wind power plants, energy storage products, as well as micro-grid systems.
Headquartered in Shanghai, China, UNISUN has offices in many countries, including Hungary, India, Japan, the Netherlands, South Korea, Thailand and the Philippines. UNISUN has branches in 28 provinces and municipalities across China, with projects in more than 100 cities nationwide. UNISUN is now one of China’s largest investors in distributed solar PV projects. So far, UNISUN has more than 1.4 GW installed capacity of power projects worldwide.

More information is available at: http://www.unisun-energy.com/ (Chinese), https://www.unisun-energy.nl/ (Dutch/English)

About Uper Energy
Uper Energy (UPER) is one of China’s largest renewable asset managers providing operations and maintenance (O&M) support for solar power plants, wind farms and energy storage systems. Operating in more than 200 cities worldwide, UPER manages power plants with more than 3 GW of installed capacity.

Selected Interview Quotes
Required skills
“Leadership. Leadership is about confidence, encouragement, and strategic vision.”

Do’s and Don’ts
“Stay focused and don’t give up!”

Messages
“Renewable energy needs more women to join. Sustainability needs more women to fight together. That’s why I established WiRA...to encourage more women to enter this industry, to make this industry more balanced.”

“Let’s work together to bring renewable energy to this world to make a better environment for our living planet. Being an entrepreneur in China is just the best experience in my life. There will always be hard days, but the times that we hold up, the times that we face them bravely, those will finally shape you and determine who you are.”

Yisha’s personal recommendation
Book
• “The Autobiography of Benjamin Franklin” by Benjamin Franklin
Tania Laden

EXECUTIVE DIRECTOR AND CO-FOUNDER
LIVELYHOODS
KENYA

Social Enterprise | Offgrid Solar and Clean Cooking

Bio
Tania Laden is the Co-Founder and Executive Director of LivelyHoods, a not-for-profit social enterprise that distributes life-changing products in Kenyan slums through a nationwide sales network of unemployed youth and women. Under Laden’s leadership, LivelyHoods has distributed over 50,000 clean energy products, such as clean cookstoves and solar lamps, while also training more than 4,500 clean energy entrepreneurs. These products have saved slum households an estimated $22.7 million in reduced fuel costs and saved three quarters of a million trees from being used for fuel.

Tania helped found LivelyHoods at the end of 2010, bringing her global business acumen and experience to the organization. Prior to her current position, she worked as a financial advisor with Morgan Stanley and as a business and technology analyst at EZLearn, an educational technology startup in Brazil. After serving as an adviser and volunteer for two years with KITO International, a Nairobi-based youth employment non-profit, she moved to Kenya to build and manage the first sales agent network created by LivelyHoods.

Tania is recognized as a 2011 Mara Foundation Entrepreneur Fellow, one of PBS Newshour’s Agents of Change, a Global Social Benefit Fellowship Fellow, and a Women in Energy and C3E award winner in 2018.

Education
- BS in Science, Technology and Society, Stanford University, United States

Company Profile
LivelyHoods is a registered 501c3 non-profit whose mission is to create livelihoods for youth in urban slums. We train unemployed youth and women to sell life-changing products, like solar lamps and clean burning cookstoves, in slum communities so they can earn an honest living.
Not only do they earn a living, but they also gain valuable skills, such as professionalism, team work, sales, and customer service, for a lifetime of employment. Through a daily consignment model, we provide a risk-free opportunity to gain professional skills and work experience.

More information is available at: https://www.livelyhoods.org/

**Selected Interview Quotes**

**Do's and Don’ts**

“Do have mentors and have someone to hold you accountable at least on a weekly basis. Take time away from your business. It gives your team time to step up in different ways and it gives yourself perspective. Be honest with yourself. If you are not happy with something, if you are feeling overwhelmed or if you are having a hard time with something you have to tell (selected) people. You can’t have it all on your shoulders. You can’t do everything."

“Do not panic (if things do not go well). All lot of things that seem like the end of the world – and they definitely could be the end of the world for your organisation – often represent big opportunities or underlying issues that you have just not been addressing. So you have an opportunity to finally address them. Be OK with failure. Say I’ll figure it out; we’ll get through it.”

**Message**

“Don’t wait for the perfect time. Don’t wait for the perfect opportunity. Don’t wait until you have all of the funding (might not be great advice ;-)). Start with what you can. Start with supporting other people’s businesses. Start with learning from other people. That may not look like you are starting a business, but that’s the foundation of it. Don’t feel like... oh, I don’t have the money raised and I’m not running a team in an office... that’s not what starting a business looks like. So, start somewhere and don’t wait until you feel like everything is in place.”

Katherine Lucey
CEO AND FOUNDER
SOLAR SISTER
NIGERIA, TANZANIA, UGANDA

Social Enterprise | Offgrid Solar

Bio
Katherine Lucey is the Founder and Chief Executive Officer of Solar Sister. Katherine is a Schwab Foundation Entrepreneur of the Year, an Ashoka Fellow, and a Draper Richards Kaplan Foundation Entrepreneur. She has received recognition and awards for her work with Solar Sister including Clinton Global Initiative, Social Venture Network, C3E, and International Center for Research on Women (ICRW) Champion of Change Award. Prior to becoming a social entrepreneur, Katherine spent over 20 years as an investment banker on Wall Street providing structured finance solutions to the energy sector.

Education
• Bachelor’s degree in Journalism, University of Georgia, United States
• MBA in Finance, Georgia State University, United States

Company Profile
Solar Sister envisions a brighter world powered by women entrepreneurs. Solar Sister trains and supports women to deliver clean energy directly to homes in rural African communities. Solar Sister provides essential services and training that enable women entrepreneurs to build sustainable businesses in their own communities. Solar Sister believes women are a key part of the solution to the clean energy challenge. This is why Solar Sister invests in women’s enterprise in off-grid communities.

Solar Sister see the opportunity to empower women and to reach those who aren’t reached by business-as-usual energy models. Centering local women in a rapidly growing clean energy sector is essential to eradicating poverty and achieving sustainable solutions to climate change and a host of development issues.

Selected Interview Quotes
Messages
Stay curious and committed and persistent.”

“Better every day. There is always more to learn. We can always be better today than we were yesterday. Having the humility to know that we are not perfect, we are not going to be perfect, but we can be better. This self-forgiveness sometimes is important to keep things moving forward.”

“Trust in yourself. The voice that you have inside of you is the most important one. Learn how to listen to it...and learn how to nurture that voice, because it is quiet.”

“You already have everything that you need to be a success, because what you have inside of you is what it takes. All the rest of it is just part of your journey, of learning how to be better and learning how to grow. But you have already got what it takes.”

Majd Mashharawi
CEO AND FOUNDER
SUNBOX
GAZA/PALESTINE

Social Enterprise | Offgrid Solar

Bio
Majd is a social entrepreneur, who has used her engineering background to create innovative solutions for modern-day problems. She is the Founder and CEO of two social enterprises, one of which is SunBox. SunBox provides solar systems and solutions to families suffering from the electricity crisis in Gaza where access to electricity has been severely restricted, sometimes to less than three hours a day.

With SunBox, she has so far provided clean and affordable electricity and clean water powered by solar to more than 5,000 people. In 2018, Majd was selected as one of the most creative people in business by Fast Company and SunBox won the MIT Pan Arab competition, competing against 6,000 entries. In September 2019, Majd and SunbBox have been awarded the Muhammed Ali Humanitarian Award in Louisville Kentucky by the Muhammad Ali Center.

Education
- BSc in Civil Engineering, Islamic University of Gaza, Palestine

Company Profile
SunBox customizes and imports solar systems according to people's electricity needs and their financial limitations. SunBox uses local vendors and technicians to sell, install and provide customer service for the solar system, offering greater value for the customer and strengthening the local economy.

Selected Interview Quotes
Messages
“It is about us, it is time for us to stand up and say “hey, we can do something!” It is not only you who can do it. We are capable of doing it. I trust ourselves so much. I trust we can go farther steps, if we stand together and support each other. And that is part of our mission. It is not only installing solar systems, but also empowering more women to go into this field.”
"I believe women can be successful if they believe in themselves and if men stand by their side."

"The sky is not the limit. We should keep our eyes on the stars and our feet on the ground. So we can grow up and go anywhere we want to if we believe in the things we are doing."

**Majd’s personal recommendation**

"My first piece of advice for entrepreneurs is to read about their ideas enough so they won’t repeat what others already did. My second piece of advice is to watch TED talks. I used to watch 2 TED talks a day and it was my source of inspiration. For the books, I love to read Biography of the world leaders."

**Books**

- The Autobiography of Malcolm X: As Told to Alex Haley by Malcolm X, Alex Haley and Attallah Shabazz
- Yasir Arafat: A Political Biography by Barry M. Rubin and Judith Colp Rubin
- The Soul of a Butterfly: Reflections on Life & Journey by Muhammad Ali and Hana Yasmeen Ali

"For opportunities, there are many great programs/fellowships/trainings/competitions and courses that they can join to learn from and also create a great network (Which is actually my asset). I recommend the following:"

- [https://www.oneyoungworld.com/](https://www.oneyoungworld.com/)
- [https://www.symposium.org](https://www.symposium.org)
- [http://emiratesenergyaward.com](http://emiratesenergyaward.com)
- [https://www.mitarabcompetition.com/](https://www.mitarabcompetition.com/)
- [https://si.se/en/apply/leadership-programmes/she-entrepreneurs/](https://si.se/en/apply/leadership-programmes/she-entrepreneurs/)
- [https://www.weforum.org/](https://www.weforum.org/)
- [https://www.globalshapers.org/](https://www.globalshapers.org/)

"I also recommend to take courses related to the business online. There are many great platforms that teach you for free like EDX and Coursera."

"Very important advice is to learn how to tell a story. The good CEO is not only the one who knows how to run the company but also how to deliver the message of the company. Watching videos in this regard is also important."
Bio
Margarete von Oppen is specialized in energy law, especially in the law of renewable energy (EEG, EEWärmeG), as well as in public planning law including European and constitutional law issues. Within this legal context she is focused on legal advice and contract design concerning all stages of project development and transactions. She advises project developers, investors, energy-intensive companies, financial institutions and sometimes the government on questions concerning the development of renewable energy installations, sustainable real estate projects and energy trading.

For many years Margarete von Oppen was a lecturer in energy law for engineering students as well as a lecturer of public planning law for students of real estate management. She is a popular speaker, co-author of diverse commentaries on the renewable energy act and publishes regularly in specialized journals.

Before she joined Arnecke Sibeth Dabelstein as a partner in 2016, Margarete von Oppen ran her own law firm specialized in renewable energy-law and public planning law for 16 years. Before that she was an in-house counsel of a real estate developer and worked as an associate lawyer for a mid-size law firm in the field of real estate development and the development of infrastructure like railways and road systems.

Education
- Law faculty of Würzburg, Germany
- Law faculty of Heidelberg, Germany: Research associate at the Institute of German and European Public Law
- Law faculty of Strasbourg, France: Post graduate studies of European law, especially European constitutional and antitrust law
Company Profile
Arnecke Sibeth Dabelstein is a law firm with 150 Lawyers, branch offices in Munich, Frankfurt, Hamburg, Berlin, Dresden, Leer, focused in 12 areas of competences amongst others in the energy sector.

Amira Rachid

CEO AND FOUNDER
ARSOLAIRE INGÉNIERIE
TUNISIA

Solar

Bio
Amira Rachid was born in Tunis where she did her primary and secondary education. Then, she moved to Strasbourg for her Master’s degree in Commercial Law at the University of Law and European Studies. Amira was actively engaged in various associations, e.g. as General Secretary of T.VER at the origin of the agreement between the Universities of Manar and Strasbourg.

After receiving her degree, she worked as a consultant with Ernst & Young. In 2010, she came back to Tunis where she held the position of Commercial manager for various renewable energy companies such as Team Loukile, also as a General Manager for Hélios. She also has worked with SOTECA Electric.

In 2014, Amira created her own photovoltaic company, the ArSolaire Ingénierie, which in 2015 entered into a partnership with the Italian company SERI Engineering to open the subsidiary SERI MAG in Casablanca, Morocco. In 2019, ArSolaire concluded a partnership with the German company SOLEA, to establish ArSolaire Ingénierie World Wide.

Education
- Master’s degree in Law, University of Strasbourg, France

Company Profile
ArSolaire is a Tunisian-Italian Company founded in Palme, Italy, specializing in the study and installation of photo-voltaic (PV) systems. It covers the entire Tunisian territory.

More information is available at: https://www.linkedin.com/company/arsolaire/

Morwesi Ramonyai

MANAGING DIRECTOR AND FOUNDER
BORENA ENERGY
SOUTH AFRICA

Renewable Energy | PV Solar Project Developer

Bio
Morwesi Ramonyai is an impact entrepreneur with a passion for advancing access-to-energy as a solution to the energy poverty problem. She is Founder and Managing Director of Borena Energy, a company that develops Solar PV projects and solutions on a turnkey basis. Borena Energy operates in the Commercial & Industrial sector as well as rural, remote and off-grid communities.

The business operates in South Africa and Zimbabwe. Morwesi was founding team member and Chief Commercial Officer of The Sun Exchange, an award winning Blockchain-based alternative funding company that finances Solar Energy Projects in Sub Saharan Africa.

Through her social impact project called Watt-A-Woman, she aspires to realise the inclusion of women in the solar eco-system. The project offers energy services while generating an income for rural women.

Morwesi was competitively selected as a 2016 Mandela Washington Fellow of the U.S. Government’s Young African Leaders Initiative, and a YALI grant winner, part of the U.S. African Development Foundation’s off-grid energy portfolio. She was also awarded a research grant by the UK’s Royal Academy of Engineering and through this in partnership with the University of Exeter she co-developed a unique Socio-Technical Assessment of Risk tool for application in rural based renewable energy projects, aptly named STAR. She has since secured additional funding in 2020 to expand STAR.

Education
- Executive MBA, University of Cape Town, South Africa
- Higher Diploma in Computer Auditing, University of Witwatersrand, South Africa
- Bachelor of Commerce in Information Systems, Rhodes University, South Africa
Company Profile

Borena Energy Solutions is a 100% Woman Owned Renewable Energy Solutions Company that develops renewable energy projects using Solar Photovoltaic (PV) technology.

Borena was established in 2007 and develops Solar based grid-tied, off-grid and hybrid solar PV projects in the C&I as well as the off-grid residential market. We have also implemented access to energy projects such as solar street lighting and innovative portable lighting solutions for disconnected communities.

Borena’s vision is to be acknowledged as a leading Renewable Energy Provider in Africa and its mission is to provide locally relevant and technologically advanced renewable energy solutions that are reliable, efficient and cost effective. Borena is based in Johannesburg, Gauteng Province and operates throughout South Africa and Zimbabwe.

More information is available at: http://www.borena.co.za/

Selected Interview Quotes

Do's and Don'ts

"Do look for a fair deal for yourself (when partnering up with someone for a business). Work at your profile, build your network, keep up-to-date with trends, with information, with organisations in the field. Stay on top of information around opportunities. Put your hand up for opportunities to speak, to write, to attend events or conferences. That’s where the network grows. You meet like-minded people and like-minded people are the ones that are going to be your scaffold when you need it most."

"Don’t be quick to partner. Take your time & reduce it to writing. Don’t be discouraged by the Status Quo, there’s always room for another player. Don’t be limited by your locality, consider other markets. Don’t be afraid to pivot. Change your strategy/ model/ approach if needs be.

Message

"We all have to put our hands on deck and make sure that we can solve the access to energy problem, because when we do that, we solve so many other problems and the world will be a better place for all."
Morwesi’s personal recommendation

There is significant and targeted support and scope for women-led and women-operated projects globally. I would recommend that women invest in a good network and database of funding opportunities. Subscribe to local and international directories, join professional women energy groups on LinkedIn etc., and be involved in your country’s professional energy associations.

There is so much movement in the sector, keeping abreast of news and developments through social media, conferences and organisations. Follow foundations and organisations that support, promote & fund renewable energy.

Katarina Uherova Hasbani

FOUNDER
ENRUP
SINGAPORE, UNITED ARAB EMIRATES

Network for energy start-up innovation

Bio
Katarina Uherova Hasbani is Founder of EnRupt, a network for energy innovation with the vision to build energy companies of the future based on clean, decentralised and digital solutions. Katarina works today on transformations shaping the energy systems of tomorrow. The future of energy will be closer to the customer, using cleaner, renewable sources and leveraging digital technologies. Katarina is supporting this transformation by building partnerships between young, innovative start-ups and corporations.

Katarina has 17 years of professional experience in energy from government & consulting in Europe, Middle East & South-East Asia. She is on the Board and Vice President of the Alliance for Rural Electrification.

Education
- Global Executive MBA, INSEAD Visiting scholar, Stanford University, United States in 2011
- Master’s degree in Political Science and Government, Institute of Political Studies in Paris (Sciences Po), France
- Master’s degree in International Relations and Diplomacy, Matej Bel University, Slovakia

Company Profile
EnRupt is a network for energy innovation with the vision to build energy companies of the future based on clean, decentralised and digital solutions. EnRupt is on the mission to create partnerships between start-ups and corporations where new ideas thrive and get executed. EnRupt has rapidly become a dynamic builder of energy-focused start-up innovation from Singapore and expanded to Dubai in late 2018. Enrupt features start-ups innovating for energy transition and inspiring women in energy.

Laurie Wiegand-Jackson

PRESIDENT, CEO AND FOUNDER
UTILITY ADVANTAGE
UNITED STATES

Energy Services Consulting

Bio
Laurie Wiegand-Jackson is a successful entrepreneur with over thirty years of experience in the energy industry. She is the President and founder of Utility Advantage, an energy services consulting firm focused on effectively improving energy efficiency and reducing GHG emissions to promote a more sustainable world with clean, affordable and reliable energy. She brings a broad range of energy industry experience including wholesale and retail energy markets, demand response, utility rates and regulation, energy efficiency, and renewable energy and storage project development.

Laurie regularly speaks at industry and public sector events on the importance of sound energy policy, energy management strategies and the benefits of energy programs. She has been recognized for her contributions to the energy industry, where she served as the President of the International Association of Energy Engineers (AEE) in 2007. Laurie received the Distinguished Service Award from AEE and she was also honored in 2008 by the Executive Women of New Jersey as a leading Policy Maker.

Laurie was inducted into the AEE Energy Manager Hall of Fame in 2016. Laurie is very active in promoting the professional advancement of women in the energy industry. She is the founder and chair of the Board of the Council for Women in Energy and Environmental Leadership (www.CWEEL.org). She also serves as chair of the energy focus group of SMART, a US Congressional Initiative.

Education
- AEE Certified Energy Procurement Professional
- BS in Chemical Engineering, West Virginia University, United States
Company Profile

Utility Advantage is an independent, majority woman-owned consulting and services company that focuses on developing and implementing sound policy and programs to promote the efficient utilization of energy resources throughout the world. Working with utility companies, businesses, governmental and institutional entities to implement energy efficiency and utility cost management programs that reduce expenses, increase efficiency and improve the carbon footprint, Utility Advantage is an innovator in the energy solutions sector. Formed in 2003 by Laurie Wiegand-Jackson, a nationally recognized energy expert and entrepreneur, Utility Advantage is headquartered in New Jersey, and provides services to customers locally and globally.

Utility Advantage’s in-house expertise spans a broad range of knowledge and experience in the areas of energy policy, utility rates, energy purchasing, renewable energy project development, energy efficiency audits, energy project management, load management programs, energy and sustainability master planning, energy management training, and onsite generation alternatives. The company has developed and implemented cost-reducing, effective utility management programs and multi-million dollar projects that have saved its clients millions of dollars.

Selected Interview Quotes

Messages

“The energy industry is a fantastic place to have a career. The opportunities are endless. You can really feel passionate about the value of what you are doing in terms of its impact on the environment. So you have a great career opportunity and can feel really great about what you do every single day.”

“Align yourself with other entrepreneurs. Reach out to women like myself and many others. We are more than willing to spend time and have conversations with you to help you and encourage you along the way. And then really listen and implement the things that you are hearing.”

Laurie’s personal recommendation

- When you start a business, don’t be afraid to dream and think big.
- Write down your vision. Develop a formal business plan to achieve your vision and divide it into phases with metrics to track performance. Have a senior level professional and/or successful entrepreneur with experience in the industry review your plan and listen to their recommendations.
- Remember that your employees and customers are your two most important assets. Treat them well - with honesty, transparency, care and fairness - and they will be loyal to you.
• Invest in sales and remember that you are always selling your business. If you don’t have sales experience, invest in your own sales training so that you can be more comfortable in your most important role as the face of the company. If you can’t yet afford to hire a sales team, create a commission, partner or agent program. Pay well to support growth.
• Surround yourself with smart people that share your values.
• Hire a lawyer to draft your corporate charter, operating agreement, etc. and be especially careful in choosing any business partners.
• Whenever possible (and by that I mean do whatever you can to) maintain ownership control of your business. Women are naturally gifted to create but are also natural givers. Be very protective of your business and don’t give away any more than you need to.
• Have fun! ‘Find something you love to do and you’ll never have to work a day in your life.’ When your business is your passion, your days will be interesting, exciting, productive, challenging, and rewarding.
• Consider Work-Life balance as an ebb and flow. There are days or even weeks when work requires more attention and other times when your family and personal life require more time. Accepting this reality will allow you to spend time where it is needed and not feel guilty. That being said, you should try to make as many family events as possible - you will not get a second chance to see your child graduate from Kindergarten or perform in her class play or sports event. Your family - spouse or partner and your children are your greatest fans and supporters.
• When you have failures (and it happens to every entrepreneur) - regroup, pivot, and continue moving ahead. There are external factors that you have no control over that will impact your plans and you will not always make the best decision. Don’t spend time lamenting - learn from it and get your head back into the game quickly.
• You will have supporters who want to help you succeed. Besides your employees, there will be friends, family, customers, partners, suppliers - many will be your advocates in the marketplace. Acknowledge and nurture those relationships. They will be critical to your success. On the other hand, not everyone will be your greatest fan. That’s OK. No need to try to win over anyone who isn’t willing to give you a chance - move on quickly and invest your time finding your next “win-win” relationship.
Kaikai Yang

CEO
DIPOLE
CHINA

Blockchain | Energy Trading

Bio
Kaikai Yang is CEO of Dipole Tech, a company dedicated to helping users trade distributed electricity with ease in any scenario using blockchain technology and Internet of Things. Kaikai was also COO and Co-Founder of Energo Labs, which became the first blockchain-based distributed energy project in Asia, winning the championship of the United Nations-sponsored Asia-Pacific Low Carbon Lifestyles Challenge, and was included in the “2018 China Blockchain Industry White Paper”.

Kaikai led the Energo team to explore markets in 10 countries including but not limited to Singapore, the Philippines, India, South Korea, Japan, Thailand, and the Netherlands. As Co-chair of the Energy Blockchain Leadership Committee, Kaikai founded the Asian Cleantech Entrepreneurs Community (ACTEC), an organization devoted to building a network of entrepreneurs focusing on sustainable development and the environment. Kaikai is also an early bitcoin investor and a jazz drummer.

Education
• BA in English Language and Literature, Shanghai Ocean University, China

Company Profile
Founded in 2018, Dipole is one of the pioneers in the field of New Energy + Blockchain. Dipole aims to build a reliable and efficient platform to trade distributed energy. Dipole allows users to trade distributed electricity with ease in any scenario using blockchain technology and Internet of Things. For energy providers, Dipole will be the energy platform of smart cities in the future, providing energy and information effectively for trillions of devices on the demand side. Dipole’s passionate, cohesive and experienced team consists of hard-working young entrepreneurs in the field of blockchain and energy. Dipole focuses on both technology and products, a rare appearance in the blockchain industry.

About GWNET

The Global Women’s Network for the Energy Transition (GWNET) aims to advance the global energy transition by empowering women in energy through interdisciplinary networking, advocacy, training, coaching and mentoring.

GWNET seeks to address the current gender imbalances in the energy sector and to promote gender-sensitive action around the energy transition in all parts of the world.

GWNET’s work focuses on:

- **Networking**: facilitating connections among women working in the fields of renewable energy and energy efficiency to advance the energy transition, through events and the Women in Energy Expert Platform.
- **Advocacy**: generating and disseminating information on the role of women in the energy transition as well as organising conferences, seminars, and workshops which foster discussions and promote gender-sensitive action around the energy transition.
- **Mentoring**: leading the development of several regional and global women mentoring programmes as well as the matchmaking of mentors and mentees within the sustainable energy sector
