

GWNET

Global Women's Network
for the Energy Transition

Celebrating 5 years of advancing and connecting women in energy

Our History

It is a well-known fact that the energy sector continues to be male-dominated. The absence of gender equality can be observed in all parts of the world.

It is important to note that gender equality has proven to be an indispensable factor in reaching sustainability. Gender diversity drives innovation, opens new pathways for technology deployment, brings fresh perspectives to the development of societies and attracts and retains a richer pool of talent.

GWNET aims to advance the global energy transition by empowering women in energy through interdisciplinary networking, advocacy, training, and mentoring.

GWNET seeks to address the current gender imbalances in the energy sector and to promote gender-sensitive action around the energy transition in all parts of the world.
